The cfg re:action range (mobile units) comprises mobile storage units of three different heights to suit nursery, primary and secondary classrooms. This mobile version of our re:action range (fixed units) give a classroom layout much more flexibility as storage can be taken where it is needed. Expensive on-site fitting charges are also avoided with this option.

† If locks are required on units with doors / drawers suffix 'L' to the cat ref.

* "green" and "fino bronze" door fronts are high pressure laminates and will incur a % price increase. Price on application.

The cfg re:action range (mobile units) comprises mobile storage units of three different heights to suit nursery, primary and secondary classrooms. This mobile version of our re:action range (fixed units) give a classroom layout much more flexibility as storage can be taken where it is needed. Expensive on-site fitting charges are also avoided with this option.

In science classrooms, a 100mm gap is required between underside of benctop and top of storage units that are mobile. For health and safety reasons, we advise customers to specify the primary height mobile units (on previous page) for mobile storage in this environment.

† If locks are required on units with doors / drawers suffix 'L' to the cat ref.

* "green" and "fino bronze" door fronts are high pressure laminates and will incur a % price increase. Price on application.
